STARTER

Work with a partner. Ask the questions below and make a note of the answers. Then tell the group what you found out and discuss.

- Who do you normally present to? (Colleagues, customers, other firms, etc.)
- When was the last time you gave a presentation in English? Was it a success? If yes, why? If not, why not? Explain your answer.
- How do you feel about presenting in a foreign language?
- Think of an excellent (or terrible) presentation that you have attended. What made it good (or bad)?

STRUCTURING A PRESENTATION (1)

Most formal - and many informal - presentations have three main parts and follow this simple formula:

- 1 Tell the audience what you are going to say! = Introduction
- 2 Say it! = Main part
- 3 Tell them what you said! = Conclusion

There are several ways you can tell the audience what you are going to say.

would like + infinitive

Today I'd like to tell you about our new plans. This morning I'd like to bring you up to date on our department.

going to + infinitive

I'm going to talk to you today about new developments in the R & D Department.

This afternoon I'm going to be reporting on the new division.

will + infinitive

I'll begin by explaining the function.
I'll start off by reviewing our progress.
After that, I'll move on to my next point.

will be + verb -ing

I'll be talking about our guidelines for Internet use.

During the next hour we'll be looking at the advantages of this system.

6 Complete sentences 1–8 with the correct form of the verb and a sentence ending from below.

you on the proposed training project

you up to date on SEKO's investment plans

you how the database works

you an overview of our present market position

at business opportunities in Asia

on our financial targets for the division

by telling you about what Jane's group is working on

about EU tax reform

1	give	Today I'd like to give you an overview of our present market position.
2	show	I'll be_showing
3	talk	During the next two hours we'll be
4	bring	I'd like to
5	report	This afternoon I'm going to
6	update	Today I'd like to
7	look	This morning we'll be
8	begin	Today I'll

STRUCTURING A PRESENTATION (2)

The purpose of the introduction is not only to tell the audience who you are, what the talk is about, and why it is relevant to them; you also want to tell the audience (briefly) how the talk is structured. Here are some useful phrases to talk about the structure.

I've divided my presentation into three (main) parts: x, y, and z. In my presentation I'll focus on three major issues. First (of all), I'll be looking at ..., second ..., and third ... I'll begin / start off by explaining ... Then / Next / After that, I'll go on to ... Finally, I'll offer some solutions.

The most common way to structure a presentation is to have three main parts, and then subdivide them into (three) smaller sections.

Complete the sentences with the words in the box.

ORGANIZATION

The final part of the introduction deals with the organization of the talk: how long it will last, whether there will be handouts, and how questions will be handled.

My presentation will take about 20 minutes.

It should take about 30 minutes to cover these issues.

Does everybody have a handout/brochure/report? Please take one, and pass them on.

Don't worry about taking notes. I've put all the important statistics on a handout for you.

I'll be handing out copies of the PowerPoint slides at the end of my talk.

I'll email the PowerPoint presentation to you.

Dealing with nervousness

The American author Mark Twain once put it like this: There are two types of people: those that are nervous and those that are liars.' So, once you accept that (almost) everybody who gives a presentation - whether formal or informal, long or short, to strangers or colleagues - is nervous, then you just need to find ways to deal with nervousness and even learn how to use it to your advantage.

Let's first look at ways to deal with and reduce nervousness.

- 1 Prepare well. 'Failing to prepare is preparing to fail.' Preparation is the key to a successful presentation. Nothing will relax you more than knowing exactly what you want to say and having practised saying it. Make sure you practise your talk until you feel at home with it - then you can concentrate on other things.
- 2 Learn to relax. Doing stretching or breathing exercises before your talk can help you to reduce nervousness. One example: before your presentation, sit comfortably with your back straight. Breathe in slowly, hold your breath for about five seconds, then slowly exhale. You can relax your facial muscles by opening your eyes and mouth wide, then closing them tightly.
- 3 Check out the room. Make yourself familiar with the place where you will be speaking. Arrive early, walk around the room, and make sure everything you need for your talk is there. Practise using any equipment (e.g. microphone, video projector, OHP) you plan to work with.
- 4 Know your audience. If possible, greet your audience as they arrive and chat with them. It will be easier to speak to people who are not complete strangers.
- 5 Concentrate on the message. Try to focus on the message and your audience not on your own fears.
- 6 Visualize success. Imagine yourself speaking to your audience in a loud and clear voice. Then visualize the audience applauding loudly at the end of your talk as you smile.

Use the steps above to reduce nervousness, but also remember that being nervous isn't all bad. Many experienced presenters say that you can also use your nervousness to give you that extra energy that you need to give a good performance.

OVER TO YOU

What other tips can you think of for dealing with nervousness? How do you deal with nervousness before or during a presentation? How do you prepare your presentations?

TALKING ABOUT (DIFFICULT) ISSUES

I think we first need to identify the problem.

Of course we'll have to clarify a few points before we start.

We will have to deal with the problem of increasing prices.

How shall we cope with unfair business practices?

The question is: why don't we tackle the distribution problems?

If we don't solve this problem now, we'll get into serious trouble soon.

We will have to take care of this problem now.

REFERRING TO OTHER POINTS

I'd like to mention some critical points in connection with/concerning payment.

There are a few problems regarding the quality.

With respect/regard to prices, we need more details.

According to the survey, our customers are unhappy with this product.

Aled's Presentation Tips

Clear and simple structure

Remember that your audience will benefit most from a very clear and logical structure. Don't overload the audience and try to use simple language.

Your introduction

Some experts say this is the most important part of your presentation. In the first few minutes you can get your audience's attention, build rapport, and create a positive impression.

Topic and objective

Clearly say what the topic and objective (or purpose) of your talk is. Repeat the topic and objective at some later time.

Signposting

Let the audience know at all times what you want to do and how you want to do it. This method is common in the American business world - so use it!

As you all know, INFOMEDIA has been able to establish some important new business contacts with partners in the US this year. This also means that the need for English in meetings and presentations has increased. That's why we have asked our American colleague Aled Hughes from our Miami office to share a few tips with

Repeating new information

Always repeat new details. This helps your audience to remember them and ensures optimal flow of information.

Summarizing points

At the end of each section summarize the main facts to make sure everybody is following.

Interaction with the audience

American audiences expect direct interaction. So treat them as individuals; show them that you care about their individual needs.

Presenter's role

The presenter is often considered as important as his or her topic, and the presenter's role is to make sure the presentation - even one on a dry topic - is interesting and entertaining. To achieve this goal American presenters often use their personalities more and tend to be more enthusiastic than people from many other parts of the world.

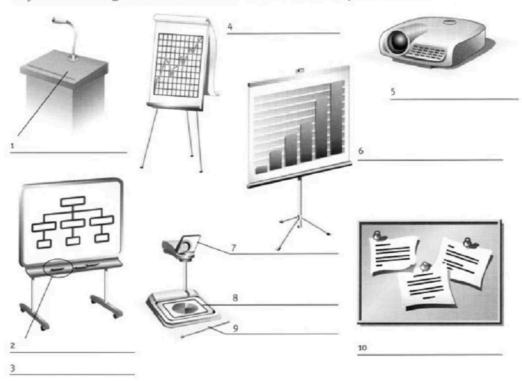

OVER TO YOU

Which of these tips do you find most useful? Can you add any other tips? Have you ever presented to an American audience? How different are American audiences from those in your own country?

SAYING NUMBERS Numbers, especially long ones, are often difficult for the audience to understand. Try to say numbers slowly and clearly, and point at them while speaking. two million 235m² two hundred and thirty-five square metres one point six billion 98% ninety-eight per cent 1.6bn one hundred and fifty thousand euro(s) $\frac{1}{3}, \frac{3}{4}$ one-third, three-quarters €150,000 Remember that: 1 we use a comma in English to show thousands and a point to show the decimal place. 2 we say '2 million' or '10 billion' (not 2 millions/10 billions). 3 we say '2 million dollars', '170 pounds' (not 2 million dollar/170 pound). How do you say these numbers in English? Write the numbers out in full. Then listen to check your answers. 1 251 5 \$19.62 2 7,489 7 175 m² 8 1,240,000 _ 3 3.8 bn 4 €49m 9 7.2 Listen to the three presentations and fill in the missing numbers below. Fill in the blank slide (4) with some key numbers and present them to a partner.

6 It is often better to use approximate numbers in presentations as they are easier for the audience to understand and remember. Put the following words in the correct column in the table.

a little less than • about • almost • approximately • around • just over • just under • nearly • roughly • well over

- (less)	+/- (about the same)	+ (more)

Rewrite the sentences replacing the exact numbers with approximate ones using words from the table. Give at least two alternatives for each.

THE RULE OF SIX

When presenting text on overheads or PowerPoint slides, it is a good idea to use the rule of six which means:

- · a maximum of six lines per slide
- · a maximum of six words per line

If you stick to this rule, you won't risk overloading your bullet charts with too much information.

Present information clearly and logically. √ 10 Remember the rule of six.

OUTPUT

What is important when presenting visuals? Which opinion(s) do you agree with?

Karen Hamilton, Marketing Manager

I think to be effective a good visual must focus on only a few points. It's important not to have too much information on one slide or transparency. Slide overload is bad because people will then spend time reading the slide rather than listening to the presenter. I normally use bullet points to structure information - I never write complete sentences. Headlines are important too.

In my opinion the presenter is the focus of the presentation - not the visuals. The key purpose for using a visual aid is to help the audience understand the topic better. So the visuals should only be used to support the presenter's message. A process-flowchart slide, for example, helps people understand visually what you are describing verbally. If a visual distracts the audience's attention from what you're saying, it's useless.

Susan Liu, Export Manager

Above all, a slide or an overhead must be readable. If the audience can't read the slide, they will soon give up. That's why font size is very important. It should be as large as possible, I'd say at least 24. And sometimes it's also a good idea to use different colours to highlight some points. Using many different colours can be confusing though.

Barbara James, Market Researcher

What you say and what you show should always go together 100%. So when you're not talking about the slide, it shouldn't be visible. I always switch off the display when I'm talking about something that has nothing to do with the slide. If people are busy looking at the slide, they aren't listening to what you're saying. It's better to use the B-key to return to a black screen or replace the slide with some form of 'wallpaper' such as a company logo.

Javier Sanchez, Financial Analyst

For me it's very important that the presenter speaks to the audience and doesn't read to them! The speaker must make eyecontact and not watch the monitor or screen while he or she is talking. I think it's extremely boring when someone just reads slides word for word as if it were an essay or something.

Tony Benetti, Media Consultant

It's called 'Death by PowerPoint' when people use so many sound effects and animations that the audience's attention is completely taken away from the delivery of the message. I think PowerPoint is a fantastic tool, but just because it has so many effects you don't have to use them all. Overuse is overkill here.

OVER TO YOU

TALKING ABOUT TRENDS (PAST SIMPLE AND PRESENT PERFECT)

We use the past simple to talk about a movement or trend which happened in the past and is now finished. Signal words for the past simple are last month/year, in January, from 1997-2001, during the oil crisis, etc.

In April the rate of unemployment rose to 5 million. Between May and July our export business almost doubled. In 2003 alone China's car production increased by 85%.

We use the present perfect to talk about a movement or trend which started in the past but is not yet finished. Signal words are since (since August), for (for five years), this month/year or expressions with over (over the past six months).

The number of German investors has declined since 1998. (It is still declining ...) The US economy has grown rapidly over the past four months. (It is still growing ...)

Note the difference between rise and raise.

to rise (without an object)

to raise sth (with an object)

Petrol prices rose again in May.

The oil industry raised prices last year.

The number of tourists has risen to 2.6 million. The European Central Bank has raised interest rates.

Look at these final statements from different conclusions. Which ones do you find most effective? Work with a partner to rank them (1 = most effective, 8 = least effective).

- a Thank you very much for your attention.
- b In conclusion, I'd like to highlight our company's highly innovative products.
- c So, to put it in the words of the famous H. Gordon Selfridge, 'The customer is always right.'
- d Well, I don't know whether this was helpful but I'd like to leave it here.
- e We have all the facts. Let's get to work now!
- f The one last thing I'd like to say is: it's your choice.
- g So, that's all I have to say. I hope you haven't all fallen asleep!
- h To conclude, I want to come back to that story I told you at the start of my presentation and say one word: apple pie!

USING YOUR VOICE EFFECTIVELY

How you say something is often just as important as what you say. You can use your voice and the way you stress words or make pauses in sentences to make your presentation more interesting and easier for the audience to follow.

Stressing words

By emphasizing particular words or parts of words you create certain effects. Notice how you can change the meaning of a sentence by putting the stress on a different word.

We all know that this is an extremely difficult market. (it's more than just difficult)

We all know that this is an extremely difficult market. (you and I agree on this)

We all know that this is an extremely difficult market. (but they don't)

Making pauses

You can use pauses to slow your pace down and make your sentences easier to understand. Group words into phrases according to their meaning and make pauses between the phrases.

In my opinion we should go into other markets.

In my opinion // we should go // into other markets.

On the other hand, the figures prove that we are on the right track.

On the other hand, // the figures prove // that we are on the right track.

10 Look at the clues in brackets and underline the word which should be stressed in each sentence.

- 1 Clearly, we need to look at this again. (it's obvious!)
- 2 Clearly, we need to look at this again. (twice wasn't enough)
- 3 We will never get such a perfect opportunity again. (this is our only chance)
- 4 We will never get such a perfect opportunity again. (but perhaps the competition will)
- 5 I'd like us to work out a strategy. (and nobody else)
- 6 I'd like us to work out a strategy. (a plan is important)
- 7 There hasn't been a dramatic increase in production costs. (but there has been an increase)
- 8 There hasn't been a dramatic increase in production costs. (the increase was in personnel costs)
- 9 I think we've made a good start. (but you might not agree)
- 10 I think we've made a good start. (but there is still a lot to do)
- 11 This is not the only option. (There might be others)
- 12 This is not the only option. (I have a better one)
- 13 Sales this month have been quite good. (But not brilliant)
- 14 Sales this month have been quite good. (We are pleased)
- 15 Where do we go from here? (I have absolutely no idea)
- 16 Where do we go from here? (Normal question)

Now work with a partner and practise reading out the sentence pairs with the correct stress. Can she or he hear the difference in meaning?

11 Read the following text. Underline the words which you think should be emphasized and use double slashes (//) for pauses in the sentences. Then listen and check.

Finally, let me come back to the key points of my talk.

I told you that in the first quarter, more than half, or 52%, of our revenues came from overseas. This is in line with the targets we set out in 2004 when we decided we wanted to continue to rely on overseas markets, especially China, to keep growing. In the past three months, we've added more new customers in China than in any other country.

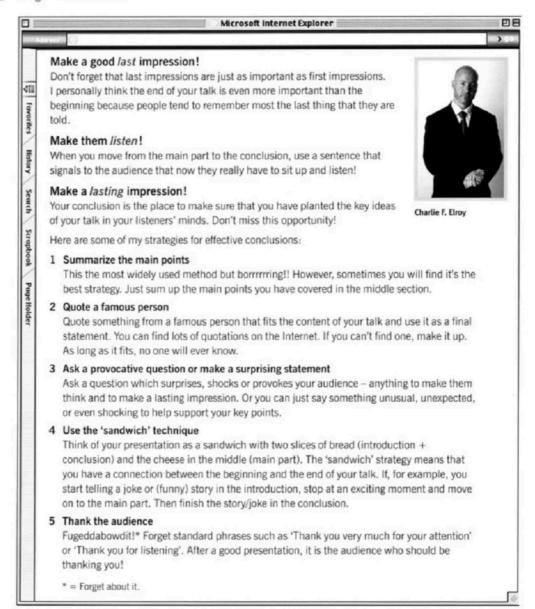

Now what are our targets for the next few months? The first major step will be the introduction of our PayPal payment service in China. And then we will focus on finding customers in existing markets, such as the US and Germany, who haven't tried buying from our website yet.

- 12 Put the words in the right order to make sentences with expressions from this unit.

 - 2 points again go I'd through like to the main
 - 3 opinion strategy sales to our change my we in have
 - 4 recommend market focus Asian I'd that we the on
 - 5 now end presentation approaching I'm of the my
 - 6 all now put let's practice into it
- 13 It's your turn now. Follow the checklist to practise making conclusions. Try to use words and phrases from the unit.

CHECKLIST FOR CONCLUSIONS ✓ 1 Signal the end of your talk. ✓ 2 Summarize the key points. ✓ 3 Highlight one important point. ✓ 4 Explain the significance. ✓ 5 Make your final statement.

DUTPUT

On his website, the American presentations guru Charlie F. Elroy, talks about his strategies for good conclusions.

OVER TO YOU

Which tips do you think are the most useful? Which are not useful at all? Why do you think that? Can you think of any other strategies for making good conclusions?

How might cultural differences between you and the audience affect the way you end a presentation? Do you remember a conclusion you found particularly effective? What did the presenter do?

Any questions?

STARTER

Work with a partner. Ask each other the questions below and make a note of the answers. Then tell the class what you found out.

ASKING POLITE QUESTIONS

There are different ways of asking questions in English. If you want to be more polite (and less aggressive), it is better to use less direct questions.

Direct questions

Less direct questions

When do you plan to move to Geneva?

Could you tell me when you plan to move to Geneva?

What is the project status? Do you mind if I ask what the project status is?

Note that in polite questions it is often necessary to change the word order or add words like if or whether.

What's the current project status? → Can you tell me what the current project status is? is that the final decision? → Could you tell me whether/if that's the final decision?

5 Look at the questions in the bubble and use the words given to make them more polite.

What you think

- 1 Are there any other options?
- 2 What would that mean for us?
- 3 How do we compare with other firms?
- Will we cooperate with our branches in the UK?
 - 5 How did she arrive at these results?
 - 6 Are there any figures to back this up?

What you ask

1	May I askif there are any other options?
2	Do you mind telling me what that would mean for us?
3	May I ask
4	Can you tell me
5	Would you mind telling me
6	Could you tell me

Now match the questions from above to the answers.

- a Of course. Basically we have two alternatives. ...
- b Well, first of all, more work for each of us.
- c Yes, we will. I've already contacted the London office.
- d Yes. As I said earlier, I'll be passing out handouts with the latest data.
- e Very well. At the moment we are market leader.
- f Not at all. They are based on the latest study.

ANTICIPATING QUESTIONS

If you know your topic well and know who your audience is, it is possible to anticipate most of the questions that will be asked. When preparing your presentation, always try to make a list of questions you expect to be asked. Some of the most common questions will be something like:

What has to be done?

How long does it take?

How much does it cost?

Is there a deadline?

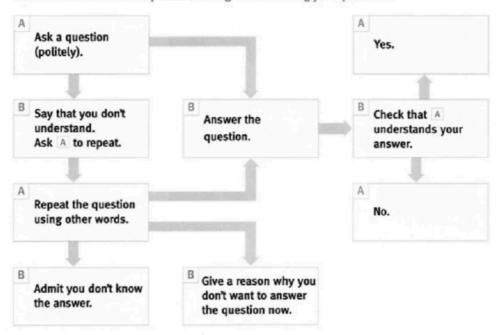

What are the alternatives?

Do we get support?

Who will be responsible?

What can go wrong?

6 Work with a partner. First think of a topic you both know well (e.g. an update on a current project or plans for a new project). Work separately to write four or five questions about the topic. Then use the flow chart to practise asking and answering your questions.

7	ม	DIO
	6	W

Sometimes you have to deal with interruptions or unexpected questions during your presentation. Listen to the following excerpts from four different presentations and say in which one the presenter:

a	postpones answering the question.	
b	deals with an aggressive question.	
C	explains a term that somebody doesn't understand.	
d	deals with a difficult question.	П

D	DEALING WITH INTERRUPTIONS							
1	Sometimes you may be asked questions during the presentation, even if you have asked the audience t wait. Whereas some questions can and should be answered quickly (for example, when a participant hasn't understood something you've said), you might prefer to postpone unwelcome questions or comments.

REFORMING QUESTIONS

It is sometimes necessary to reformulate a question (i.e. say it in another way) before answering it. This not only gives you time to think, it also allows you to make sure you have understood the question. With a large or noisy audience, it allows the other participants to hear the question (again) and finally, it gives you the chance to change the tone of the question, e.g. by making it less aggressive.

You can use the following phrases and the techniques in the table below to reformulate questions:

I see. So, what you're asking is: ...

If I understand you correctly, you want to know ...

OK, let me just repeat your question so everybody can hear it.

If I could just rephrase your question ...

The question is:	You reformulate to make it:	by:				
negative Isn't there a better solution?	positive What would be a better solution?	leaving out negative words such as no, never, none				
aggressive Do you honestly believe we can get the contract?	neutral You're asking whether I think it is possible to get the contract.	avoiding words which sound aggressive or have a negative meaning such as honestly, really, disaster				

- 10 Reformulate the following questions using the techniques and phrases in the box above.
 - 1 Are you really sure we can meet our deadline?
- 4 Do you honestly think we can rely on them?
- 2 Won't we get support from headquarters?
- 5 Isn't there a better way to reduce costs?
- 3 Do you really think this will work?
- 11 Put the words in the right order to make sentences with expressions from this unit.
 - 1 point back perhaps get we later can to that
 - 2 answer question can't afraid I that I'm
 - 3 correctly I've you'd system if understood works know like how the you to
 - 4 deadline interested meet I'd to know the can if be we
 - 5 those arrived you how may figures at I ask ?
 - 6 Sarah to department speak suggest you I the from marketing
- 12 It's your turn now. Practise the phrases from this unit using the checklist.

1		Listen carefully.
V		
1	2	Make sure you have understood the question correctly.
1	3	Reformulate the question in your own words.
1	4	If you want to postpone the question, say why politely.
1	5	If you don't know the answer, say so and offer to find out.
1	6	Answer irrelevant questions politely but briefly.
1	7	Check that the questioner is satisfied with your answer.

OUTPUT

Look at what these people say about the question and answer session. Which opinion(s) do you agree with?

Person 1 For me, the auestion and answer session is the most difficult part of a presentation. I don't like it at all. You never know what questions will be asked, so you can't really prepare. I always feel extremely nervous. The problem is you have to say something quickly and don't have the time to think of a clever reply.

Person 2 If you ask me, most questions aren't really questions at all. It seems as if a lot of people ask questions not because they want to get an answer but because they want to show the other participants how clever they are or how funny or whatever. I think some people just want to show off or be the centre of attention.

Person 3 I like the way questions are asked by American audiences. My experience is that they usually say something positive about a presentation before they start asking questions. I think that's a very good thing because the questioner shows some respect for the presenter and also helps create a more relaxed and friendly atmosphere during the question period.

Person 4 I think it's important to try and predict all the questions you might be asked. Before a presentation I always make a list of questions I expect people to ask. Then I think about possible answers and practise them. Sometimes I even get friends and colleagues to ask me questions. Of course you can't anticipate all the questions but at least you don't need to worry about the ones you have thought about. I feel much more comfortable this way.

Person 5 You need to decide when you want to answer questions. Allowing questions during your talk usually creates a rather informal, seminar-like atmosphere. You can answer questions directly and involve the audience. On the other hand, answering questions after the presentation gives you more control of your structure and timing. If you want questions after your talk, you can say that your time frame is very tight or the topic is rather complex.

OVER TO YOU

Do you usually answer questions during or after your talk? Which do you prefer? What other tips can you think of for preparing for the question period? How often do you present to an English-speaking audience? How different is it from presenting to an audience in your own language?

First I talked about the delays that we've been having with the first trials and showed you how we are dealing with them. Then we reviewed the various partners that are currently involved in the project and how we can work together most effectively. Finally, I talked about the next steps, i.e. where we go from here. So, to conclude, I'd like to highlight one key point. That's the fact that we were able to get IRG Design involved. This is very important to the success of the project as they have a lot of experience in this area and a very good reputation for quality. So, now you've got the full picture. Any questions?

UNIT 1, EXERCISE 1

Presentation 1

Good morning, ladies and gentlemen. First of all, let me thank you all for being here today. I'm glad that so many of you could come, especially since I know that this time of the year is probably the busiest for you. Let me introduce myself. My name is Don Taylor. I'm the head of logistics here at Air Spares. Logistics is a centre of competency dedicated to providing you with the spare parts you need, precisely when you need them. I'm here today to present our new semiautomatic shelving system. My talk is particularly relevant to those of you who place orders for the different parts we supply.

Presentation 2

OK, shall we get started? Hello everyone. For those of you who don't know me, I'm Charlotte Best from IT. I'm a team leader. I'm happy that so many of you could make it today at such short notice. I know that you're all extremely busy at the moment, so I'd like to start with my presentation right away. As you can see on the screen, our topic today is project documentation. We're going to look closely at drafting, storing, archiving as well as accessing documents in our new SAP system. We'll also examine the much improved handling of all project documentation as well as user rights. This is extremely important for all of us who are directly involved in international project management, right? You don't need me to spell it out ... if it isn't documented, it doesn't exist.

Presentation 3

Good afternoon. I'm aware that you all have very tight schedules, so I appreciate you taking the time to come here today. As you probably know, my name is Susan Webster. I'm the new human resources manager here at Weston Ltd. What I'd like to present to you today is my department's new concept for improving our incompany training and qualification programmes. This is based on feedback from your departments. Today's topic will be very important for you as department heads, since I'll need your help to evaluate and select candidates for training.

UNIT 1, EXERCISE 12

You know, I was sitting in the waiting room at the dentist's the other day when I came across something very interesting in one of the magazines that was lying there. It said that chocolate is really a vegetable because we get it from cocoa and sugar, which come from cocoa beans and sugar cane - both plants, i.e. vegetables, right? Chocolate a health food? Ha! You know, it's all about the way things are presented and how we look at them. Image building, ladies and gentlemen, that is our business, and we're here today to ...

Imagine you worked in a small to medium-sized company and were responsible for making people in your company aware of health and safety issues. How would you go about it? Would you have a meeting? Send everyone an email? Take a few moments to think about it.

Did you know that the number of possible ways of playing the first four moves per side in a game of chess is 318,979,564,000? Let me just write that number on the board: 318 billion, 979 million, and 564 thousand. Now, what does that have to do with our topic today, which, as you know, is project management? Well, let

So, let me start by asking you a question. Why should we introduce a double quality check here at Auto Spares & Parts, one at goods-in and another at goodsout? After all, our products come from certified suppliers and we have an excellent track record for providing quick and competent service. So, why bother? Well, I'm here today to tell you why. For those of you who don't know me, my name is ..

UNIT 2, EXERCISE 1

As you know, I've been asked to talk to you about the handbooks for our all-in-one systems for smaller businesses. Peter Collins from customer care has told me that they have been getting a lot of phone calls and emails from users who say that the set-up instructions are extremely complicated and don't match the sketches. What I'd like to do today is to make some suggestions on how we can make our handbooks more user-friendly.

I'd like to talk to you today about how globalization has changed the face of the insurance industry. The purpose of my talk is to provide you with information on the major developments in the insurance market in the last few months. I'd like to start with ...

OK, let's get started. We're here to discuss the introduction of short-time work in our company. As you know, our order books are not the fullest at the moment so we have to find ways to get through this crisis and at the same time keep jobs. What I want to do this morning is to show you how we could reorganize our working hours. Among other things, I'll be talking about ...

As you can see from your handouts, we'll be looking at some new European transport regulations today. The objective is to bring you up to date with the latest changes which will be introduced on January 1. These changes will mainly affect transport companies in the EU but they will also ...

UNIT 2. EXERCISE 9

Thanks, Jim. OK. As you probably know, we are 15 currently having difficulties with our new men's cosmetic line. These problems lie chiefly with our main bottle supplier, but we are also having trouble with distribution. I'd like to quickly identify the problems and then make some suggestions on how we can deal with the consequences.

So, let's start with our bottle supplier then We've been having serious difficulties with GSG, which is our main plastic bottle supplier, regarding both quantity and quality. We don't understand why, but they don't seem to be able to supply the quantities we order from them. In addition, the quality of the material is so poor that we have had to return about 40% of the bottles. We've been trying to cope with these problems - the delays, the poor quality - all along, but so far we've not been able to find ways to prevent them from happening again. It's clear we can no longer continue to accept these conditions. Moreover, we're now getting ready for the Christmas season. If we don't solve our supply problems within the next two weeks, we'll run into serious trouble with respect to our Christmas business.

Let's move on to distribution. Here the problem lies with ...

UNIT 3, EXERCISE 1

Take a look at these figures. They clearly highlight how a combination of two significant external factors affected our business in the first two quarters of this year. One important factor is the oil price, the second the development of the euro against the dollar. In 2002 we exported nearly two-thirds of our products to the US and Canada. Since then oil has become much more expensive and so has the euro. Let me show you what this means for our export business. I'll just write some figures on the board and then we will go on to discuss the next point.

OK. Let's now have a look at our new magnetic ski rack Matterhorn which was launched in August. This system is more compact than the old one and also easier to handle. Another advantage is that it can also be used for snowboards. We hope to sell at least 5,000 of these systems within the next two months. On the next slide you will see an illustration of the Matterhorn X-15.

As I explained earlier, we've worked very hard to make our products more attractive for the customer. These are the sales figures for Europe for the first three quarters of this year. As you can see here, we've had a very successful year. We have sold about 21,000 fully automatic espresso machines and nearly 7,500 semiautomatic machines so far. To highlight our success even further, let's go back to the 2003 figures on the previous page. Let me just flip back to it. Ah yes, here

UNIT 3. EXERCISE 4

See page 25 Answer key on page 62. 60

UNIT 3, EXERCISE 5

Let's look at the figures in this table more closely. As you can see in the first row, we sold 18,250 cars in Germany in the first quarter while in the same period we sold roughly 32,000 in the EU. Our non-EU market was still relatively small with sales of about 8,000 cars. Now if you look at the second quarter, you will see a dramatic change. Whereas our German business didn't increase much, sales in the other two areas developed very well. In the EU, 47,500 cars were sold and in non-EU countries sales went up to 17,300, which I'm sure you will agree is an extremely good result.

If you look at the next slide, you will see the layout of our new open-plan office in Hamburg. As you can see from the plan, it's 24.8 metres long and about 16 metres wide, for a total of just over 400 square metres. Our office will be on the 12th floor of the building. which has a total of 16 floors. We'll be moving to our new premises on 15 February if everything goes according to plan.

3 You can see the five most expensive cities for business travellers in this table. Venice leads the table with an average rate of €387. In Rome, the business traveller has to pay €239 and in Paris a room costs €226. In New York City the average room rate is €225 and in Milan it's €215 per night.

UNIT 3, EXERCISE 8

So, we've seen that our new line of refrigerators is environmentally friendly. Let's now turn to the next point, which is their unique design. I'd like to draw your attention to three new design features. First, the refrigerators are more colourful. Apple started the trend of colourful computers in the office. We think that consumers want more colour in their kitchens, too, and our refrigerators provide that. What's really interesting here is that customers can change the colour panels there are five colours to choose from - to match their home, their mood, the seasons, whatever. The second unique design feature is the circular shelving system. Each shelf can be rotated, so that all items of food are easy to reach and nothing gets lost in the back of the fridge again. And finally, the new refrigerator has a compact design. This means that it takes up less floor space while holding as much as a conventional

refrigerator.

About 1,000 businesses in the UK were asked if Britain should introduce the euro. What are the results of this survey? Well, I think you'll agree that the results are quite interesting. As you can see from this table, 49% said they wanted to 'wait and see'. Only 13% said Britain should never join the euro zone. The good news is that nearly 35% said we should go in immediately. So, where do we go from here?

The next chart shows the breakdown by age in our company. You can see that the biggest segment almost 70% - indicates the percentage of employees in the age group 35 to 50. About 19% of our staff are between 51 and 60 years of age and 2% are above 60. The final 'pie' is the most interesting for our discussion today; it shows the percentage of employees under 35 years of age, which I think you'll be surprised to hear is currently only 9% of our total staff.

Presentation 2

Let's now have a look at the sales figures over the past five years. First, let me quickly explain the graph. You can see that different colours have been used to indicate each of our main sales areas. The key in the bottom left-hand corner shows you which colour represents which area. The red line, for example, gives us the sales figures for Belgium, the green line is for Germany, and so on. OK, so I'd like to first draw your attention to the sales figures for France - that's the blue line here.

Presentation 3

Now I'd like you to take a look at this next slide which shows how the cost of living developed in Europe between 2003 and 2007. According to the European Economic Institute, living expenses rose by between 1.1 and 2% each year. If you look at the bar chart on the left, you will see that the highest increase was in 2005 with a rise of 2%.

UNIT 4. EXERCISE 5

Presentation 1

First, I'd like you to look at this graph, which shows the ups and downs in our passenger volume over the past nine months. As you can see here, passenger numbers fluctuated between 2.1 and 2.3 million in the first four months. They even rose moderately in May, reaching just over 2.5 million at the end of the month. In June you'll notice a sharp fall in passenger numbers as a direct consequence of HLX's entry into the market. Now as you all know, HLX is a no-frills airline with direct flights to almost all major south east Asian cities. Passenger traffic slumped to about 1.5 million - a decline of almost 40%. In early July we introduced a new, more aggressive pricing system to boost sales. As a result, ticket sales started picking up in July. By the end of September passenger numbers had reached just over 2 million.

Presentation 2

On the next graph you'll see the sales figures for Systex in the past five years. Let me now highlight the most important facts about our hay fever medication. Despite an intensive advertising campaign, we had a slow start in Europe in 2003, selling 500,000 units in the first twelve months. The figure rose by about

50,000 in the following year. In 2005, however, sales rocketed to 1 million following the problems at TC PHARMA, our main competitor in the anti-allergy sector. 2006 saw an even further increase in sales to 1.3 million due to the extremely warm and long summer. As expected, sales went down again in 2007 and stood at just over a million at the end of the year.

UNIT 4. EXERCISE 11

See page 38.

UNIT 5. EXERCISE 1

Well, this brings me to the end of my presentation. Before I stop, let me go through my main points again. You gave us the brief to find out (a) whether we can reduce our air travel costs by using budget airlines and (b) if so, how we should proceed. So, to sum up ... first question: is it really viable to use these no-frills airlines? Clear answer there! In some cases we can save as much as 60% compared to regular flights. The next question: how to proceed? In other words, who would be able to handle the online bookings most efficiently? I'll just run through the three different options we investigated again: option 1, we take on a part-time employee for this job; option 2, staff book their own flights; option 3, we outsource this function. So, what is the best solution for us? From a financial point of view our results are absolutely clear: option one. A part-timer would be the best, the cheapest, and least time-consuming solution. We'd therefore recommend that we recruit a part-time employee who could handle all our online bookings. The ideal candidate should either have some Internet experience or have previously worked for a travel agent. We'd suggest a limited contract to begin with. So, now it's up to you to decide where to go from here. I'm sure you'll make the right choice. Now I'll be happy to answer any questions you may have.

UNIT 5, EXERCISE 6

Let me go back to the story I told at the start of my talk. Remember, the sales meeting in Vienna with the disappointed Japanese businessmen? Three days later we got an email saying they were going with us after all. So, this just shows you that knowing your entire product range is the key to success.

So, to conclude, I'm convinced that ICM would be an excellent method to make better use of the knowledge we have. And it would strengthen our market position. So, do we really want to miss this opportunity to get ahead of our competitors?

Finally, let me highlight the key question once again: do we need a digital telephone system or can we upgrade the existing one? As I've shown in my brief presentation today, we must invest in the new system; an upgrade is just not feasible. I'd just like to finish with something former US president Bill Clinton once said: 'You can put wings on a pig, but you don't make it an eagle."

Before I end my presentation today, I'd like to briefly recap the main reasons for doing business with us. We use state-of-the-art technology. We provide round-theclock professional customer care. And, most important, we customize our products and services to give you what you need when you need it. So, the next step is yours. Set up an appointment with our project manager and our SAP consultant and we can work out the best practice solutions that suit your business.

And now I'll be happy to answer any questions you may have. Yes?

You were talking about software problems. What exactly do you mean by that?

Well, I mentioned earlier that the new software is being tested at the moment. In the trial runs we've had more than 150 bugs so far and at the moment we're not sure how long it will take us to solve all these problems. Does that answer your question?

Yes, thank you.

Ø 2

Are there any more questions? Mr Lee?

Would you mind telling us whether the new software will help to improve our company's

I'm afraid I don't quite understand your question. Could you be a bit more specific?

Yes, I'd like to know whether we will also use the new software to make our company more attractive for the customer. I'm talking about a new website, interactive applications, and so on.

Oh, I see. Yes, well, as I said earlier ...

I have another question. It's about the piloting stage. Which division will start piloting the software first?

If you don't mind, I'd prefer not to discuss that today. Actually, there will be a meeting next week where that will be decided.

Mr Martinez, you have a question?

Yes. You spoke about special training courses earlier. Could you tell us how they will be organized?

Sorry, I'm afraid that's not my field. But I'm sure Linda Cole from the training department could answer that question. I'll ask her to get in touch with you on that. Well, if there are no more questions, all that remains for me to do is to wish you a nice evening!

UNIT 6, EXERCISE 4

So, delivery of the units has been set for 15 May. 43 A That gives us three months to handle the production and packaging. I'd like to turn now to

Ah, excuse me. Do you really think that's realistic? I mean, three months. What about our staff problems?

If I have understood you correctly, Louise, your question is how we can meet the delivery date as we are slightly under-staffed in production at the moment. Well, let me answer your question right away. First of all ...

(5) 2

And talking of mergers, don't forget the successful German haircare company, Wella, which was taken over by Procter and Gamble only a few years ago. What we need to discuss is whether it's the right moment for us to consider a merger with Carter Financial Services.

Could you tell us what their turnover was last year?

Sorry, if you don't mind, I'd like to answer your question a bit later when we discuss the financial side of this merger. OK, I was just moving on to the timing of the merger and ...

Ø 3

... and this brings me to the most important topic of today's session. Due to our new European harmonization strategy, our complete sales, aftersales, and marketing departments will be relocated to Aberdeen by July next year. Now I know this may come as a shock to most of you but I can guarantee that all the staff affected will be fully supported every step of the way.

Excuse me, but may I ask how you propose to support those people who are tied to this location, for example those of us who care for elderly parents or whose children are in a special needs

school for example?

Yes, that's a very valid question. Let me just repeat it so everybody can hear. You're concerned about staff members who will find it difficult to move away from Bristol due to family commitments. Yes, well, of course we will not force anyone to move and our works council is working very closely with HR to find the best solutions for everyone. If you look on our intranet ...

The main advantages of 'smart' credit cards are ... Sorry to interrupt, but could you explain what 'smart' means in this context?

Yes, sure. It means that the big credit card companies like Visa and Mastercard use special microchips instead of the usual magnetic strips on their cards. Does that answer your question?

Yes, thank you.

OK, so let's go back to the main advantages of 'smart' credit cards. ...

Handouts

Does everybody have a handout/brochure/copy of the report? Please take one and pass them on.

Don't worry about taking notes. I've put all the important statistics on a handout for you.

I'll be handing out copies of the slides at the end of my talk.

I can email the PowerPoint presentation to anybody who wants it.

Ouestions

There will be time for questions after my presentation. We will have about 10 minutes for questions in the question and answer period.

If you have any questions, feel free to interrupt me at any time.

Feel free to ask questions at any time during my talk.

EFFECTIVE OPENINGS

Rhetorical questions

Is market research important for brand development? Do we really need quality assurance?

Interesting facts

According to an article I read recently, ...
Did you know that ...?
I'd like to share an amazing fact/figure with you.

Stories and anecdotes

I remember when I attended a meeting in Paris, ...
At a conference in Madrid, I was once asked the following question: ...
Let me tell you what happened to me ...

Problem to think about

Suppose you wanted to How would you go about it? Imagine you had to What would be your first step?

THE MIDDLE/MAIN PART

Saving what is coming

In this part of my presentation, I'd like to talk about ... So, let me first give you a brief overview.

Indicating the end of a section

This brings me to the end of my first point. So much for point two. So, that's the background on .. That's all I wanted to say about ...

Summarizing a point

Before I move on, I'd like to recap the main points. Let me briefly summarize the main issues. I'd like to summarize what I've said so far ...

Moving to the next point

This leads directly to my next point. This brings us to the next question. Let's now move on/turn to .. After examining this point, let's turn to ... Let's now take a look at ...

Going back

As I said/mentioned earlier, .. Let me come back to what I said before ... Let's go back to what we were discussing earlier. As I've already explained, As I pointed out in the first section, ...

Referring to other points

I have a question in connection with/concerning payment.

There are a few problems regarding the quality. With respect/regard to planning, we need more background information.

According to the survey, our customer service needs reviewing.

Adding ideas

In addition to this, I'd like to say that our IT business is going very well.

Moreover/Furthermore, there are other interesting facts we should take a look at.

Apart from being too expensive, this model is too big.

Talking about (difficult) issues

I think we first need to identify the problem. Of course we'll have to clarify a few points before we start.

We will have to deal with the problem of increasing prices.

How shall we cope with unfair business practices? The question is: why don't we tackle the distribution problems?

If we don't solve this problem now, we'll get/run into serious trouble soon.

We will have to take care of this problem now. We are currently having difficulties with ...

Rhetorical questions

What conclusion can we draw from this? So, what does this mean? So, just how good are the results? So, how are we going to deal with this increase? So, where do we go from here? Why do I say that? Because ... Do we really want to miss this opportunity to ...?

DESCRIBING VISUALS

Introducing a visual

Let's now look at the next slide which shows ... To illustrate this, let's have a closer look at ... The chart on the following slide shows ... I have a slide here that shows ... The problem is illustrated in the next bar chart. According to this graph, our net profit has doubled. You can see the test results in this table. As you can see here, ...

Explaining a visual

First, let me quickly explain the graph. You can see that different colours have been used to indicate

The new models are listed across the bottom. The biggest segment indicates . The key in the bottom left-hand corner ...

Highlighting information

I'd like to stress/highlight/emphasize the following point(s). I'd like to start by drawing your attention to ... Let me point out that . I think you'll be surprised to see that ... I'd like you to focus your attention on ...

What's really important here is . What I'd like to point out here is ... Let's look more closely at ...

Describing trends

Sales increased slightly in summer. Consumer spending fell/declined sharply. Interest rates have risen steadily. Food prices went up significantly. There was a sudden increase in prices. In August, we saw a moderate fall. This was followed by a gradual decline. There was a sharp slump in sales. Ticket sales have started picking up.

Explaining purpose

As a consequence/Consequently, sales went up significantly.

The venture resulted in a sharp fall in share prices. Our new strategy has led to an increase of 10%.

CONCLUSION

Indicating the end of your talk

I'm now approaching/nearing the end of my presentation.

Well, this brings me to the end of my presentation. That covers just about everything I wanted to say about ..

OK, I think that's everything I wanted to say about ... As a final point, I'd like to ...

Finally, I'd like to highlight one key issue.

Summarizing points

Before I stop, let me go over the key issues again. Just to summarize the main points of my talk ... I'd like to run through my main points again ... To conclude/In conclusion, I'd like to ... To sum up (then), we ...

Making recommendations

We'd suggest .. We therefore (strongly) recommend that ... In my opinion, we should ... Based on the figures we have, I'm quite certain that ...

Inviting questions

Are there any questions? We just have time for a few questions. And now I'll be happy to answer any questions you may have.

EFFECTIVE CONCLUSIONS

Quoting a well-known person

As ... once said,

To quote a well-known businessman, ... To put it in the words of ...

Referring back to the beginning

Remember what I said at the beginning of my talk today?

Let me just go back to the story I told you earlier. Remember, ...

Clarifying questions

I'm afraid I didn't (quite) catch that.

I'm sorry, could you repeat your question, please? So, if I understood you correctly, you would like to know whether ...

So, in other words you would like to know whether ... If I could just rephrase your question. You'd like to know.

Does that answer your question?

Avoiding giving an answer

If you don't mind, could we discuss that on another occasion?

I'm afraid that's not really what we're discussing today. Well, actually I'd prefer not to discuss that today.

Admitting you don't know

Sorry, I don't know that off the top of my head. I'm afraid I'm not in a position to answer that question at the moment.

I'm afraid I don't know the answer to your question, but I'll try to find out for you.

Sorry, that's not my field. But I'm sure Peter Bott from Sales could answer your question.

Postponing questions

If you don't mind, I'll deal with/come back to this point later in my presentation.

Can we get back to this point a bit later?

I'd prefer to answer your question in the course of my presentation.

Would you mind waiting until the question and answer session at the end?

Perhaps we could go over this after the presentation.

Summarizing after interruptions
